Where Delicious Meets Nutritious

For nutritional analysis UFood Grill utilizes Healthy Dining which has been endorsed by the National Restaurant Association.

Healthy Dining's computerized nutrition analysis of these menu items is based on recipes submitted by UFood Grill. The nutrition values listed are based on the United States Department of Agriculture (USDA) nutrition information database, the source most commonly used for estimating nutritional content of foods, and/or values provided by the manufacturer. If values for a particular ingredient were not available from the USDA database or the manufacturer, Healthy Dining utilized nutrition data from ingredients that closely match a similar product's nutrition profile.

USDA research has found that nutritional values of foods can vary between individual samples of a particular food by as much as 20%, due to such factors as season, soil conditions, region of the country, product suppliers and other factors. Therefore, data listed on the nutrition reports represent approximations only and fall within the Food and Drug Administrations' allowable variance. The values listed in the Nutrition Facts column on the reports are rounded according to FDA's guidelines.

UFood Grill Nutrition Facts and Dietary Guide
